Your free C-Drama / Donghua watchlist starter

The honest question with a C-drama or donghua is never what you've watched — it's how much is left. This free starter is a single tab that answers it. Log a series, tell it the episode count, how far in you are, and the runtime, and it works out the hours left to finish it.

How to use it

- 1 Open C-Drama-Donghua-Watchlist-Starter.xlsx in Excel, Google Sheets, or LibreOffice.
- 2 Add a row per series; pick the type, genre, and status from the dropdowns.
- 3 Fill Eps, Watched, and Min/Ep — the pale-teal Hours Left column does the rest. The summary up top totals the hours across what you're watching.

READY FOR THE WHOLE QUEUE?

This starter computes the hours left, but you still eyeball across the rows yourself. The full C-Drama / Donghua Tracker does the sorting and the analysis: a self-filling Up Next queue that ranks what you're watching closest-to-done first, a live Dashboard that breaks down your genres, your top series, and your critics' top five, a built-in genre guide that settles wuxia from xianxia, Critic Ratings, a Watch Journal with goals, a five-lane rating, and a one-click Google Sheets copy. [Get the full C-Drama / Donghua Tracker >](#)

Free starter from Ardent Workshop. The example catalog is fictional and illustrative — every series title, rating, and note was invented to show the tool in use, and is not a real production, review, or person's opinion. A personal watch log, not professional or purchasing advice. Free to use; please don't resell or redistribute.
