# Your free grant deadline tracker

The simplest way to stop a grant deadline from sneaking up on you: put every application deadline in one place, set a status, and let the file count down to each one. This free starter is a single tab that does exactly that — a taste of how the full Nonprofit Grant-Tracking OS keeps a whole grants program on the rails.

## How to use it

- 1 Open Grant-Tracker-Starter.xlsx in Excel, Google Sheets, or LibreOffice.
- 2 List each grant you're working: the funder, the program, the application deadline, and a status from the dropdown.
- 3 Watch 'Days to deadline' count down on its own — a negative number means the deadline has passed. Sort by it to see what's next.

### READY FOR THE WHOLE PROGRAM?

This starter tracks deadlines on one tab. The full Nonprofit Grant-Tracking OS runs the whole grant lifecycle: a prospect pipeline with win rate, a reporting calendar that flags overdue reports, a restricted-fund tracker, a live dashboard, a funder directory, and four plain-English guides — one owned file for Excel, Google Sheets, and LibreOffice. [Get the full Nonprofit Grant-Tracking OS >](#)

Free starter from Ardent Workshop. The example grants are fictional and illustrative. This is a tracking template, not accounting software and not financial, legal, tax, or grant-compliance advice. Not affiliated with or endorsed by any funder.
