Your free photocard starter sheet

Here's the simplest way to stop losing track of your photocard collection: one row per card. This free starter is a single tab where you log the group, the member, the album or version, and whether you have it or want it. Have colors green, Want colors amber, and a little count keeps a running total of both.

How to use it

- 1 Open KPop-Photocard-Tracker-Starter.xlsx in Excel, Google Sheets, or LibreOffice.
- 2 Add a row per card — group, member, album or version — and pick Have or Want from the dropdown.
- 3 Watch the cards color themselves and the Have / Want count update, then overwrite the fictional example with your own collection.

READY FOR THE WHOLE COLLECTION?

This starter is one tab with a have / want flag. The full K-Pop Photocard Collection & Trading Tracker adds the rest: condition and type for every card, a wishlist with priority and budget, a trade & sell board, and a live Collection Dashboard that counts cards by group, type, and status and estimates your collection's value — plus a field guide and printable binder inserts, in one owned file for Excel, Google Sheets, and LibreOffice. [Get the full K-Pop Photocard Collection & Trading Tracker >](#)

Free starter from Ardent Workshop. The example groups are fictional and illustrative. A fan-made cataloging tool — card values are your own estimates, not a price guide or investment advice, and it is not affiliated with or endorsed by any group, label, agency, or marketplace.
