

ARDENT WORKSHOP

AN ARDENT WORKSHOP PRODUCT

Free Rewards Balances Starter

Every points balance and its expiration on one tab — free from Ardent Workshop.

Don't lose the points

Your free rewards-balances starter

The simplest way to stop losing points to expiration: put every balance in one place with its expiration date, and let the sheet flag anything about to lapse. This free starter is a single tab that does exactly that — a taste of the full Travel Points & Miles Rewards Tracker.

How to use it

- 1 Open Rewards-Balances-Starter.xlsx in Excel, Google Sheets, or LibreOffice.
- 2 List each program, its balance, and its expiration date (leave Expires blank for points that don't lapse).
- 3 The Status column flags each one — Active, Expiring soon, Expired, or No expiry — so you act before the date.

READY FOR THE WHOLE TRACKER?

This starter flags expirations. The full Travel Points & Miles Rewards Tracker adds an estimated value for each balance, an award-goal tracker that pulls your balances, a card annual-fee and benefit calendar, and a dashboard — one owned file for Excel, Google Sheets, and LibreOffice.
